Problems accessing OASIS
CHRISTOPHER Balthrop - 2014-01-31 - 0 Comments - in Software

IF you are having issues accessing OASIS due to a security issue with Java, try the following steps...

Either update to version 7 update 25

OR

-Go to your Windows Control Panel
- Go to your Java Control panel inside of the windows control panel
- On the Security Tab, lower the security level to medium then apply the changes

Then return to oasis and you should be able to load the plugin and sign in.

This information provided by the Oasis webpage.
